

### **1st Gray's Stonemarr Shock 'n' Awe (16 23.07.2009**

A really attractive looking baby who had a super round head shape with good ears which fit well, just slightly open at the base.

Nice profile with a short broad nose. Eyes which are a fraction deep set but with colour still to fully settle. She does have a slight green rim to the centres at present.

Cheeks filling out well and a broad round muzzle line, firm chin and level bite. Not overlarge but four square and cobby with good weight and short little legs and firm round paws. Tail in balance to both her body and legs.

Super thick dense coat of pale blue which you can really sink your fingers into, as yet still baby soft in texture Shown in lovely condition.

My take home baby of the day, a cracking British blue baby of very promising type, coat, body and colour.

Lovely apple head shape, good ears set well apart. Very pretty type, level bite and good chubby cheeks developing.

Superb pale blue coat totally sound to the roots, no silvering or banding either! Woolly but this is typical of age.

All balanced and in proportion. Yummy!
